

REMAPPING UNKAPANI

border | boundary | thresholds

The main purpose of the study is to look for the dichotomy, duality, multidimensionality and the possibilities of the concept of boundary, within a journey re-thinking the space / place - the space that we don't have a command of its boundaries -in a scope that even how its circumstances form boundaries is ambiguous and thinking the space with wide range of boundaries – and the traditional space that we do have command of its boundaries....

In this framework, the design studio is going to be consisted of two parts: with the theme of the **BAZAAR ON SPACE**, the initial short term project is going to deal with a bazaar structure on extreme condition.

The second part of the studio is going to focus on the theme of "border / boundary / thresholds" in the Unkapanı region to deal with long term mix-use project.
