

## exploratory primary school

*The attempt is to propose the development of an educational milieu for primary education of children between ages 3 and 12. A curriculum which will aim to develop all the senses and organs of the learner by offering affective learning methods and techniques (whether or not it is carried on in classes, on the playground, in nature, or elsewhere), enhanced by a child-centered, informal approach will be considered.*

*Students will be prepared to become active, lifelong learners, responsible individuals with respect for themselves and others, and to have the capacity to participate in the world around them. The ultimate purpose is to propose a setting which promotes the spiritual, moral, cultural, mental and physical development of pupils at the school and of society; and prepares such pupils for the opportunities, responsibilities, and experiences of adult life.*
