PERFORMING ARTS CENTER

in Moda

This project aims to provide alternative solutions for a performing arts center, which will be considered as part of *Moda Culture and Art Foundation* (Moda Kültür ve Sanat Vakfı, MKSV). The project will expand MKSV's public spaces, allowing the Foundation to offer a variety of art programs and events as well as a more open, accessible, and engaging space. Drawing on the argument that great art institutions not only contain exemplary works of art but also liberating spatial experiences, the project is expected to be committed to these dual responsibilities and bring art and people together. Located on the seaside in Moda, this cultural hub is expected to redefine the coastal line by subtly taking part in the Bosphorus silhouette, while creating an opportunity for the public to explore this unique intersection of water and land.
