

ITU FACULTY OF ARCHITECTURE 2017*2018 FALL TERM
ARCHITECTURAL DESIGN STUDIO 6-7
NURBIN PAKER ASSOC. PROF. DR. PELIN ISIK RSCH. ASS.

*RESILIENCE

Cities around the world are going through a period of unprecedented growth and change. This means that the infrastructure that keeps cities running — from schools and hospitals through to housing and roads — will come under increasing stress. Extreme weather events and terrorism will only add to this pressure. With global investment in infrastructure high the conditions are right for cities to start prioritizing resilience.

THE MAIN STUDIO AIM IS TO SEARCH FOR A DESIGN WITH THE SYMBOLIC DIMENSIONS OF TRAUMA AND RECOVERY IN CITY.+
